Alpha Hospitals Provision of low/medium secure units

*Main Image: Bury Hospital
Above and Below: Woking Hospital*

Baqus has been retained by Alpha Hospitals for extending their private sector secure psychiatric hospitals at Bury, Sheffield, and Woking. Alpha Hospitals provide specialist services in purpose built facilities which are designed to offer exceptionally high standards of accommodation, with a particular emphasis on accommodating patients with multiple disabilities.

The latest project is located in Woking, Surrey. The works included a twenty-two bedroom new build extension to the existing hospital including a full basement with a gym, kitchen and general office and administration areas. Other works included refurbishment of the existing hospital, new gymnasium and external works programme.

The new-build component of the Bury scheme provided eighty new en-suite medium secure bedrooms. This hospital specialises in accommodating patients with multiple disabilities and rooms were purpose-designed accordingly.

At Sheffield we worked closely with the Client and Contractor to develop innovative solutions to building on an extremely restricted site with a very steep gradient and difficult ground conditions.

All the projects have been challenging, working within existing hospital environments. All projects have been successfully completed with no disruptions to the day to day running of the existing hospitals.

By working closely with the Contractor we have been able to produce high quality buildings within tight budgets.
